President’s Message: Heads Up! Membership Survey Underway Soon

To better improve the way our union works, and to ensure our membership is involved in every stage of policy development, SEIU-West is partnering with the University of Saskatchewan Social Science Research Laboratory to conduct a general membership survey.

This anonymous, scientifically accurate survey will consult with a sample of members on everything from tactics to policy to ensure members continue to drive the union forward as we grow.

The survey will be conducted over the telephone by professional researchers, and will only take a fraction of your time. Your responses remain anonymous, but are pivotal to ensuring your voice on our future is heard.

The survey will take place in early November, so if you get a call from the University of Saskatchewan on behalf of SEIU-West, this is not spam but actually a really important opportunity to be heard.

Your executive board is delighted to work with the U of S on the survey, and excited to hear your feedback, and ideas. We are Stronger Together!
